**SET RIGOLĂ DE DRENAJ DIN BETON
POLIESTER CU GRILĂ DIN FONTĂ ȘI SISTEM
DE FIXARE A GRILEI**

STORA BASE channels with galvanized protective edge are the ideal solution for surface water drainage in areas with medium to heavy traffic loads. The **STORA BASE** range offers solutions for surface water drainage in areas such as kerb sides, business parks, industrial estates and car parks that require the ability to withstand occasional heavy loadings. The **STORA BASE** channels are available in **B=100**, **B=150**, **B=200** and **B=300** width. The low weight of the channels as well the tongue and groove joining system simplify the installation. The height range of channels allow connection with stepped fall system.
